LinkedIn [mahdi-mosavi](https://www.linkedin.com/in/mahdi-mosavi)

GitHub [mahdi475](https://github.com/mahdi475)

SKILLS

Languages

Python, SQL, C++, C#, JavaScript /
TypeScript

AI / ML

LLM Integration

Gemini, Claude, Codex

Model Evaluation

Embeddings, cross validation,
regression, classification

Hyperparameter Tuning

GridSearchCV, RandomizedSearchCV

Web & Data

React, REST APIs, PostgreSQL,
Supabase, Pandas, scikit-learn

Tools & Systems

Git, Linux / GNU (daily use), Unity,
Networking Fundamentals (CCNA1)

LANGUAGES

Swedish	●●●●	C2
English	●●●○	C1
Persian	●●●○	C1
Norwegian	●●●○	B2
Spanish	●●○○	A2

PROFILE

Computer Engineering student (BSc, expected 2027) relocating to Madrid for a technical internship in software development, data, or AI. I like building things people actually use, from a Python automation tool with LLM integration to full stack web apps and small machine learning projects. Alongside my studies, I've also managed real IT infrastructure for a **1,600+ employee** company.

PROJECTS

Telegram Job Mail Bot [Python](#) · [Cloud \(scheduled\)](#) · [Gemini API](#)

Cloud hosted Python bot that checks email **twice daily**, uses an LLM to flag high priority messages (e.g. interview invitations), and pushes real time alerts via Telegram.

Bilia Scraper [Python](#) · [Web Scraping](#)

Python scraper that extracts and structures Bilia car listings into CSV / HTML exports. Used by a real family to compare vehicle prices.

Chocolata MVP [React](#) · [TypeScript](#) · [Supabase](#) · [PostgreSQL](#)

Full stack ecommerce MVP with product catalog, cart, and persistent backend storage.

Parkour Runner 3D [C#](#) · [Unity](#) · [HLSL](#) / [ShaderLab](#)

Team built physics based character controller (variable jump height, dashing, jump buffering) with custom shaders. Emphasis on testing and code quality.

Uganda Football Academy Website [Web Development \(pro bono\)](#)

Pro bono website for a youth football club in Uganda, later extended using Codex. Helped the club secure real donations.

EDUCATION

BSc in Computer Engineering, University West, Sweden [Sep 2024 to Jun 2027](#)

Specialization: Programming and Network Technology

- Top grade **(5/5)** in Object Oriented Programming with C++.
- Relevant coursework: Data Structures and Algorithms, Operating Systems (GNU/Linux), Distributed Systems and Full Stack Development, Computer Architecture, Introduction to AI and Machine Learning (supervised learning, neural networks, LLM fundamentals, embeddings, fine tuning).

Exchange Student, UC3M, Leganés [Sep 2026 to Feb 2027](#)

WORK EXPERIENCE

Freelance Developer, Web and AI Assisted Solutions [Mar 2026 to Present](#)

- Build small business websites, landing pages, and AI assisted web prototypes for independent clients.

IT Application Manager, Crew 4 You Sweden AB [Mar 2026 to Jul 2026](#)

- Built and managed Google Business Profiles across multiple office locations for a staffing agency with **1,600+ employees**.
- Managed and developed the company website.
- Worked with a team to plan and help kick-start a new internal app development initiative.

*Additional experience: Event Technician, Delivery Driver, Youth Boxing Coach, Car Detailing, and Elderly Care Support. **Five years** of part time work alongside studies built reliability and adaptability.*

CERTIFICATIONS & INTERESTS

Certification

- CCNA1: Introduction to Networks (Cisco)

Interests

- Technology · Football · Chess · Fitness & Gym
