Computer Engineering Student | Junior Software & Web Developer

PROFESSIONAL SUMMARY

B.Sc. Computer Engineering student focused on junior software and full-stack web development. Experienced with React, TypeScript, Python, C++, Git, Supabase, and Linux-based development workflows. Practical IT and web experience from Crew 4 You, supported by project work including a full-stack e-commerce MVP, a personal portfolio website, and a Unity-based 3D game prototype.

TECHNICAL SKILLS

Programming: Python, C++, C#, TypeScript, JavaScript, HTML, CSS, Bash, SQL

Frontend & Web: React, Vite, responsive design, UI components, portfolio websites, landing pages

Backend & Cloud: Supabase, PostgreSQL, authentication, storage, database design, Azure fundamentals

Systems & Tools: Git, GitHub, VS Code, Visual Studio, Microsoft 365, Google Business Profiles, Linux, Windows, macOS

Game Development: Unity, C#, 3D environments, player controllers, UI systems, ShaderLab, HLSL

Core Areas: Automation, full-stack development, databases, system design, networking, troubleshooting, SEO basics

SELECTED PROJECTS

Chocolata MVP | Full-Stack E-commerce Platform

React, TypeScript, Supabase, Redux Toolkit, PostgreSQL, Playwright, Vite

Full-stack marketplace MVP for chocolate products with separate flows for buyers, sellers, and admins. Built with React, TypeScript, Supabase Auth, database tables, storage, protected routes, and E2E testing.

- Implemented role-based authentication and user flows for buyer, seller, and admin accounts.
- Built product catalog, cart, checkout, seller dashboard, order overview, and admin management features.
- Designed Supabase database structure with users, products, orders, order items, categories, and seller verification tables.
- Used Supabase Storage for seller verification uploads and database policies.
- Added Playwright E2E test structure and project documentation for setup, database configuration, and future development.

Portfolio Website | Personal Developer Portfolio

React, TypeScript, Vite, Tailwind CSS, Vercel

Modern personal portfolio website for presenting projects, GitHub links, technical skills, and contact information with a responsive layout and clean UI.

- Built project cards with status badges, technology tags, GitHub buttons, and detailed project modals.
- Added project presentation structure and responsive layout for desktop and mobile.
- Deployed the website using Vercel and connected it to a GitHub-based development workflow.
- Used TypeScript and a component based React structure for maintainability.

Parkour Runner 3D | Unity Game Prototype

Unity, C#, ShaderLab, HLSL, 3D Game Development

3D platformer prototype focused on movement mechanics, physics, level interaction, environmental hazards, and game UI.

- Implemented player movement features such as jumping, dashing, cooldowns, and responsive controls.
- Built dynamic obstacle concepts including traps, fire walls, collectibles, and interactive level elements.
- Designed UI elements such as pause menu, main menu, and in-game feedback.
- Worked with Unity project structure, C# scripts, ShaderLab/HLSL assets, and 3D scene organization.

PROFESSIONAL EXPERIENCE

IT & Web Coordinator - Crew 4 You, Gothenburg, Sweden,
Onsite

Mar 2026 - Present

Support and improve the company's digital presence, internal IT workflows, web systems, and cloud-based tools, with focus on structure, visibility, usability, and scalable digital processes.

- Managed and created 3 Google Business Profiles, Supported SEO-related improvements, improving local search visibility, business information accuracy, and customer-facing digital presence.
- Assisted in the development of a confidential internal application, gaining practical experience with React, TypeScript, Supabase, authentication flows, database structure, and cloud-based application management.
- Contributed to company website development, including content structure, responsive design, layout improvements, and technical implementation.
- Supported documentation, troubleshooting, digital organization, and practical improvements to internal IT processes.

Freelance Developer - Web, AI-Assisted Solutions, Remote

Mar 2026 - Present

Build small business websites, landing pages, portfolio pages, and AI-assisted web prototypes.

- Developed responsive websites and landing pages for small-business use cases such as service businesses, restaurants, hotels.
- Used AI-assisted development tools to speed up prototyping, improve content structure, and solve implementation problems.
- Built frontend projects using modern web tools, reusable components, and Git-based workflows.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Computer Engineering - University
West, Trollhättan, Sweden

Sep 2024 - Jun 2027

- Relevant coursework: Object-Oriented Programming with C++, Data Structures and Algorithms, Python, Distributed Systems and Fullstack Project, Operating Systems with GNU/Linux, Network Technology, Computer Architecture, Embedded Systems, Mathematical Statistics, and Control Engineering fundamentals.

High School Diploma, Technology Program - LBS Kreativa
Gymnasiet, Gothenburg, Sweden

Sep 2021 - Jun 2023

- Specialized in game development using Unity, C#, Design, Animation and Autodesk.

Certifications: CCNA1 - Cisco (2025), Driver's License Category B (Manual Transmission)
